

To get to zero indigenous case by 2022 and sustain it thereafter to achieve Malaria elimination by 2025

Identification

Project Title: To get to zero indigenous case by 2022 and sustain it thereafter to achieve Malaria elimination by 2025

AMP ID: 87238117724135

IATI Identifier:

Gender Marker: Neutral

Climate Change Neutral

Budget Head:

Status: On-Going

Status Reason:

Budget Type Off Budget

Input:

1. Case investigations and Supervision and verification of case investigation
2. Foci Response/Active case detection and follow-up at Active Foci
3. Radio/FM messages broadcasting
4. Case detection at community by FCHVs and Village Malaria Workers
5. Engaging the private sector provider case notification, recording and reporting malaria cases
6. Onsite mentoring and coaching on integrated TB/HIV and malaria in existing border health desk
7. Procurement of LLINs for continuous distribution
8. Responsive spraying the insecticides for possible out brake
9. RDT test at community
10. Development of pre and post-travel information materials (print materials/jingles) for broadcasting in inter-country/province bus services, by existing border health desk
11. Workshop for dissemination of Laboratory plan and improving internal QA/QC of malaria microscopy at province level
12. Establish microscopy/RDT quality database at province level
13. Meeting for Integration of malaria surveillance into national DHIS system
14. Advocacy meeting with MoHP, Ministry of Communication, select corporate sector
15. Meetings for strong political commitment for malaria elimination central level
16. ToT for Province, district level staff on case detection, case investigation, transmission focus investigation and transmission focus response
17. Training for field staff in the local level and volunteers on case detection, case investigation, transmission focus investigation and transmission focus response
18. Training and refresher training of medical doctors on NMTP and case management - public sector
19. Orientation of FCHVs and Village Malaria Workers for case detection in community
20. Training and refresher training of medical doctors on treatment guidelines case management - Private sector

21. Orientation on elimination and training NMTP for health care providers- Private sector
22. Refresher-training on malaria entomology at central level and in selected districts for entomologists and technicians
23. Orientation and program Briefing at Local level of High and moderate risk Districts
24. Conduct external malaria microscopy competency assessments
25. Assessment of Surveillance system- National
26. Internal and External program evaluation
27. Household survey for availability and use of LLINs

Output:

1. CM-1a Proportion of suspected malaria cases that receive a parasitological test at public sector health facilities
2. CM-1b Proportion of suspected malaria cases that receive a parasitological test in the community
3. CM-1c Proportion of suspected malaria cases that receive a parasitological test at private sector sites
4. CM-2a Proportion of confirmed malaria cases that received first-line antimalarial treatment at public sector health facilities
5. CM-2b Proportion of confirmed malaria cases that received first-line antimalarial treatment in the community
6. CM-2c Proportion of confirmed malaria cases that received first-line antimalarial treatment at private sector sites
7. CM-5 Percentage of confirmed cases fully investigated and classified
8. CM-6 Percentage of malaria foci fully investigated and classified
9. VC-1 Number of long-lasting insecticidal nets distributed to at-risk populations through mass campaigns
10. VC-3 Number of long-lasting insecticidal nets distributed to targeted risk groups through continuous distribution
11. M&E-2a Completeness of facility reporting: Percentage of expected facility monthly reports (for the reporting period) that are actually received
12. M&E-2b Timeliness of facility reporting: Percentage of submitted facility monthly reports (for the reporting period) that are received on time per the national guidelines

Outcome:

1. Malaria O-1a Proportion of population that slept under an insecticide-treated net the previous night
2. Malaria O-1b Proportion of children under five years old who slept under an insecticide-treated net the previous night
3. Malaria O-1c Proportion of pregnant women who slept under an insecticide-treated net the previous night
4. Malaria O-2 Proportion of population with access to an ITN within their household
5. Malaria O-9 Annual blood examination rate: per 100 population per year (Elimination settings)

Impact:

1. Malaria I-2.1 Confirmed malaria cases (microscopy or RDT): rate per 1000 persons per year
2. Malaria I-3.1 Inpatient malaria deaths per year: rate per 100,000 persons per year
3. Malaria I-4 Malaria test positivity rate
4. Malaria I-9 Number of active foci of malaria

Treasury Type:

Humanitarian Aid: No
